

Name: Mrs. Manisha w/o Sushil

Age: 30

Marital Status: Married

Gender: Female

Date of Session: 05/12/2022

- **Summary of Session**

- The session was to psychoeducate the client about stress and how it impacts the treatment.
- The client was in high distress and had a breakdown. Upon further investigation, it was discovered that she has been on anti-depressants and is consulting psychiatric help.
- The mood and affect were low. She looked tensed and had not been sleeping well.
- To calm her down breathing relaxation was practiced in the session.
- Referred to clinical psychologist for further assistance.

Tests Done: PSS

Test Findings: The score totalled to 25, suggesting Moderate level of stress.

Note Not for medico-legal purposes. No diagnosis of severe stress or depression can be made based on the results of the PSS because it is a screening test. The following session will include any additional, in-depth assessment if required.
