Hematology Coagulation Profile

APTT (Partial Thromboplastin Time), Citrate Plasma, Sodium Citrate

Date	21/Sep/2021	10/Jun/21	Unit	Bio Ref Interval
	08:54AM	01:24PM		
APTT	25.0	24.2	Sec	24.0 - 36.0
Control	28.2	28.2	sec	

Interpretation

(Activated Partial Thromboplastin Time; PTT)

APTT is the test which checks the "intrinsic coagulation" pathway and is useful for detecting screening of haemophilia A & B, screening of coagulation inhibitors like lupus anticoagulant.

APTT can also be used to monitor heparin monitoring.

Raised APTT is found in - Liver disease, DIC, heparin treatment, circulating inhibitors (Lupus Anticoagulant), and haemophilia (deficiency of Factor VIII & IX).

Low APTT may be seen in - high concentration Factor VIII and is independent risk factor for increased incidence of thrombus formation.

Advice: - 'APTT mixing study', 'Lupus Anticoagulant test', 'specific Factor(s) assay' may be added on for further evaluation.

Prothrombin Time (with INR), Citrate Plasma

Date	21/Sep/2021	10/Jun/21	Unit	Bio Ref Interval
	08:54AM	01:24PM		
Prothrombin Time (PT)	10.3	10.7	Sec	9.8 - 13.3
MNPT Value	11.5	11.5	Sec	
INR	0.90	0.93		

Interpretation

(Syn: - Prothrombin Time)

PT is the test which checks the "extrinsic coagulation" pathway and is useful for detecting coagulation deficiency, liver disease and disseminated intravascular Coagulation (DIC).

PT can also be expressed as International normalized ratio (INR) used for monitoring warfarin therapy.

Raised PT value seen in - factor deficiency (Fibrinogen (I), Prothrombin (II), factor V, VII, X), oral anticoagulation therapy, liver diseases, Vitamin K deficiency and DIC.

Advice: - 'PT mixing study', 'specific factor(s) assay' may be added on for further evaluation.

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
