Double Marker*, Serum

DELFA

Downs Syndrome Risk(T21)	Low Risk
Edwards Syndrome Risk(T18)	Low Risk
Patau Syndrome Risk(T13)	Low Risk

Comment Statistical Evaluation has been done using Life Cycle Screening management software

The Screening test is based on Biochemical results, Patient's history and population data. This indicates a high or low risk category test. Few cases of false positivity can occur in this screening test. Confirmation of screen positive results is recommended in the amniotic fluid.

The test is valid between 11th and 13th weeks 6 days of gestation.

Kindly correlate with clinical findings

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
