|---------------|----------------------------|----------------------|-----------------------------------------|
| Patient Name  | : Perna Aggarwal           | Centre               | : 1533 - Arctern Healthcare South Delhi |
| Age/Gender    | : 36 Y 9 M 2 D /F          | OP/IP No             | : OP/109129/                            |
| Max ID/Mobile | : 330368/8752005200        | Collection Date/Time | : 26/Oct/2021 07:49AM                   |
| Lab ID        | : 1265102100250            | Receiving Date       | : 27/Oct/2021                           |
| Ref Doctor    | : Dr. Richika Sahay Shukla | Reporting Date       | : 27/Oct/2021                           |
| Passport No.  | :                          |                      |                                         |

### Microbiology

#### Urine Culture & Sensitivity

Method : Semi quantitative-Culture/ID & Sensitivity by Vitek 2

Result : No growth.  
Interpretation. : Sterile after Overnight/24 hours of aerobic incubation at 37 degree C.

#### Comment

| Urine pus cells /HPF | Colony count                                        | Interpretation                                                                                                                                  |
|----------------------|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <5                   | 10 <sup>3</sup>                                     | Insignificant growth, more likely to be a colonizer.<br>To be treated only if the patient is symptomatic                                        |
| <5                   | 10 <sup>4</sup>                                     | Moderately significant growth. Should be correlated clinically and to be treated only if the patient is symptomatic                             |
| <5                   | 10 <sup>5</sup>                                     | Significant growth. Should be treated if the patient is clinically symptomatic                                                                  |
| >5                   | 10 <sup>3</sup> / 10 <sup>4</sup> / 10 <sup>5</sup> | Significant growth. Should be treated if the patient is clinically symptomatic                                                                  |
| 5 - 10               | No growth                                           | Kindly rule out the cause of sterile pyuria i.e Is the patient on antibiotics Or anyother systemic illness (e.g TB /STD)                        |
| >5                   | Mixed growth                                        | Mixed growth of more than two types of organisms indicating specimen colonization. Kindly send mid-stream urine sample after proper collection. |

Kindly correlate with clinical findings

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Lab shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
