

Laboratory Investigation Report

Patient Name	: Neelam Kumari	Centre	: 1534 - Arctern Healthcare Noida
Age/Gender	: 44 Y O M O D /F	OP/IP No	: OP/99170
Max ID/Mobile	: 443252/8752005200	Collection Date/Time	: 27/Aug/2021 01:13PM
Lab ID	: 1266082100639	Receiving Date	: 27/Aug/2021
Ref Doctor	: Dr.Dr. Richika Sahay Shukla	Reporting Date	: 27/Aug/2021

Immunoassay

Test Name	Result	Unit	Bio Ref Interval
Anti Mullerian Hormone, Serum*			
Anti Mullerian Hormone (AMH) CLIA	0.15	ng/mL	0.00 - 3.27

Ref Range Interpretation :

Anti-Mullerian Hormone (AMH) is a hormone secreted by cells in developing egg sacs (follicles). The level of AMH in blood is generally a good indicator of ovarian reserve.
Low AMH levels are considered to be an indicator of a **low ovarian reserve**, i.e. few remaining follicles. AMH levels decline with age, and in younger women this may be a sign of premature loss of fertility
AMH does not change during menstrual cycle, so the blood sample can be taken at any time of the month - even while using oral contraception.
AMH level for a fertile woman is 1.0-4.0 ng/ml

In males AMH is secreted by immature Sertoli cells (SC) and is responsible for the regression of Müllerian ducts in the male fetus as part of the sexual differentiation process. AMH is also involved in testicular development and function.

AMH level ng/ml	Effects for fertility treatment
<0.4	Very low value. Very few eggs at stimulation. Pregnancy chances significantly low.
0.4 – 1.0	Low value. Treatment may be possible.
1.0 – 3.5	Normal value. Good possibility of treatment.
>3.5	Suggestive of ovarian hyperstimulation syndrome / PCOS

Note :- Optimal ovarian reserve values range between 2 - 6 ng/mL in reproductive age group

Kindly correlate with clinical findings

*** End Of Report ***

Dr. Poonam. S. Das, M.D.
Principal Director-
Max Lab & Blood Bank Services

Dr. Dilip Kumar M.D.
Associate Director &
Manager Quality

Dr. Nitin Dayal, M.D.
Principal Consultant & Head,
Haematopathology

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
