Comment

Urine pus cells /HPF	Colony count	Interpretation
<5	10 ³	Insignificant growth, more likely to be a colonizer. To be treated only if the patient is symptomatic
<5	10 ⁴	Moderately significant growth. Should be correlated clinically and to be treated only if the patient is symptomatic
<5	10 ⁵	Significant growth. Should be treated if the patient is clinically symptomatic
>5	10 ³ / 10 ⁴ / 10 ⁵	Significant growth. Should be treated if the patient is clinically symptomatic
5 - 10	No growth	Kindly rule out the cause of sterile pyuria i.e Is the patient on antibiotics Or anyother systemic illness (e.g TB /STD)
>5	Mixed growth	Mixed growth of more than two types of organisms indicating specimen colonization. Kindly send mid-stream urine sample after proper collection.

Kindly correlate with clinical findings
