

Patient Name : Ms. PRAKRITI MALIK
Age/Sex : 35 Y/Female
Patient ID : 012207310038
Barcode : 10038
Ref. By : Dr. Richika Sahay Shukla
SRF No. : 0606203248870
Aadhar No : 888447129579
DOB :
Registration No : 51610
Registered : 31/Jul/2022
Collection : 31/Jul/2022 03:15PM
Received : 31/Jul/2022 03:15PM
Reported : 31/Jul/2022 06:22PM
Panel : Arctern Healthcare
Passport No. :

SARS-CoV-2 (COVID-19) REAL TIME RT-PCR

Specimen: Nasopharyngeal And Oropharyngeal
**SARS CoV-2 (COVID-19) RTPCR : NEGATIVE
QUALITATIVE**
Type of Specimen : Nasopharyngeal /Oropharyngeal Swabs

Observation

Result	Remarks
Positive	RNA specific to SARS-CoV-2 Detected
Negative	RNA specific to SARS-CoV-2 Not Detected
Inconclusive	A Repeat testing on fresh sample is recommended

Note

1. ICMR Registration number for Covid -19 is **NKPLPGH**.
2. Please scan the QR code given at top of this report to check the authenticity of the report.
3. Negative result does not rule out the possibility of Covid-19 infection. Presence of inhibitors, mutations & insufficient RNA specific to SARS-CoV-2 can influence the test result. Kindly correlate the results with clinical findings. A negative result in a single upper respiratory tract sample does not rule out SARS-CoV-2 infection. Hence in such cases a repeat sample should be sent. Lower respiratory tract samples like Sputum, BAL, ET aspirate are appropriate samples especially in severe and progressive lung disease.
4. Covid-19 Test conducted as per kits approved by ICMR / CE-IVD / USFDA.
5. Kindly consult referring Physician / Authorized hospitals for appropriate follow up.
6. This is a qualitative test. The Ct values do not provide a measure of viral load due to inherent variability in sampling and kits. According to ICMR guidelines Ct values should not be used to gauge the severity of the disease.
7. It is recommended that RTPCR test not be repeated in any individual who has tested positive once either by RAT or RTPCR (ICMR guidelines).
8. No testing is required for COVID-19 recovered individuals at the time of hospital discharge in accordance with the discharge policy of MoH&FW.

Comments

Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). Coronavirus disease (COVID-19) is a new strain that was discovered in 2019 and has not been previously identified in humans. Signs & symptoms of infection include fever, cough, shortness of breath, loss of taste & smell, pneumonia, severe acute respiratory syndrome and kidney failure.
