

### Laboratory Investigation Report

|               |                            |                      |                                  |
|---------------|----------------------------|----------------------|----------------------------------|
| Patient Name  | : Minakshi                 | Centre               | : 2412 - Arctern Healthcare, GGN |
| Age/Gender    | : 39 Y 0 M 0 D /F          | OP/IP No             | : OP/161863/                     |
| Max ID/Mobile | : 703221/8752005200        | Collection Date/Time | : 16/Aug/2022 06:07PM            |
| Lab ID        | : 2167082200523            | Receiving Date       | : 17/Aug/2022                    |
| Ref Doctor    | : Dr. Richika Sahay Shukla | Reporting Date       | : 19/Aug/2022                    |
| Passport No.  | :                          |                      |                                  |

#### Microbiology

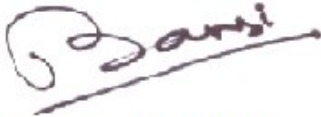

|             |           |                              |
|-------------|-----------|------------------------------|
| Ceftazidime | Resistant | $\leq 4 - \geq 16$           |
| Ceftriaxone | Resistant | $\geq 64.0 \leq 1 - \geq 4$  |
| Cefuroxime  | Resistant | $\geq 64.0 \leq 8 - \geq 32$ |
| Doxycycline | Resistant |                              |
| Minocycline | Resistant | $\leq 4 - \geq 16$           |

#### Comment

| Urine pus cells /HPF | Colony count                                        | Interpretation                                                                                                                                  |
|----------------------|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <5                   | 10 <sup>3</sup>                                     | Insignificant growth, more likely to be a colonizer.<br>To be treated only if the patient is symptomatic                                        |
| <5                   | 10 <sup>4</sup>                                     | Moderately significant growth. Should be correlated clinically and to be treated only if the patient is symptomatic                             |
| <5                   | 10 <sup>5</sup>                                     | Significant growth. Should be treated if the patient is clinically symptomatic                                                                  |
| >5                   | 10 <sup>3</sup> / 10 <sup>4</sup> / 10 <sup>5</sup> | Significant growth. Should be treated if the patient is clinically symptomatic                                                                  |
| 5 - 10               | No growth                                           | Kindly rule out the cause of sterile pyuria i.e Is the patient on antibiotics Or anyother systemic illness (e.g TB /STD)                        |
| >5                   | Mixed growth                                        | Mixed growth of more than two types of organisms indicating specimen colonization. Kindly send mid-stream urine sample after proper collection. |

Kindly correlate with clinical findings
